Subject: organic standards

Dear Ms. Torres:

I would like to urge you to establish standards for true pasturing of cows used in organic milk production. In the eyes of we consumers, part of what organic means is that animals are treated humanely. For cows, that means pasture. It has also been shown that pastured cows produce milk with more Omega -3 EFAs. For these reasons, I hope pasture will become a requirement. Thank you.

Sincerely,

Anna Nicholas
